

Original Style (BR Series) Battery Racks

Our Original Battery Racks come pre-assembled, just set the batteries on the shelves and run wiring. Conduit holes are provided at both ends of the shelves. Like our Knock-Down version, these models are constructed out of steel and have a white powder coated finish. These Battery Racks offer the versatility of mounting various battery sizes, but can also accommodate a variety of electrical components such as inverters and charge controllers.

Standard models are frame and shelves only. BP models are shipped with side and back covers plus the front/top cover. All models ship via commercial truck.
