

# Econo-Box™ Series Aluminum Enclosure

In addition to meeting NEMA 3R requirements, our newest and most value-oriented enclosure is economical enough to be used in NEMA 1 applications as well. This enclosure will hold a single battery up to Group 27 in size. Standard features include: easy slide-off front cover, all aluminum construction, white powder coat finish and stainless hardware for the front cover.

Additional options include pole mounting for 2" - 6" poles and tamper resistant hardware, call for pricing.

14x12x8 Enclosure with (1) Group 27 Battery

Model	Nominal OD
14x12x8 NEMA 3R Part No. 55-2501-010 Holds 1 Group 27 battery	8 x 14 x 12

Add our UNI-SA™ Mount and the Pole Mount Kit option to our Econo-Box (right) and you have the industry's most economical solution for small stand-alone systems. The UNI-SA can mount over 50 different solar panels, is pole, wall and flat surface mountable. In addition, it can accommodate a wide variety of angle adjustments to meet requirements of various installation locations.

This system can provide renewable energy for a wide variety of applications including, but not limited to: water pumps, garage door openers, security, lighting, and road signs.

**All systems can ship UPS**
